REGULATIONS (cont'd)

2.3 Obligations of the Customer (cont'd)

2.3.3 <u>Jurisdictional Report Requirements</u> (cont'd)

- G) The Customer shall keep sufficient detail from which the percentage of interstate use can be ascertained and upon request of the Company make the records available for inspection. Such a request will be initiated by the Company no more than once per year. The Customer shall supply the data within 30 calendar days of the Company request.
- H) The Customer may provide an additional percentage of interstate use for Entrance Facility and Direct Trunked Transport subject to the reporting requirements previously listed in this section. The percentage of interstate use may be provided per individual facility or at the billing account level. Should the Customer not provide a percentage of interstate use, the Company will use the reported Feature Group B or Feature Group D aggregated percentage of interstate use.
- (I) Identification and Rating of VoIP-PSTN Traffic

This section governs the rating and identification of VoIP-PSTN Traffic. In accordance with the Federal Communications Commission's Report and Order released November 18, 2011 (FCC 11-161) and Second Order on Reconsideration released April 25, 2012 (FCC 12-47), both in WC Docket No. 10-90, et al. (together, the "FCC Orders"): (1) intrastate VoIP-PSTN Traffic that originates on the Company's network and is bound for the Customer's end users is subject to the intrastate switched access rates set forth in this tariff until June 30, 2014, after which time it will be subject to interstate rates contained in the Company's Tariff F.C.C. No. 2 and in Section 5 herein; and (2) intrastate VoIP-PSTN traffic that is sent by the Customer for termination to Company end users is subject to interstate switched access rates set forth in the Company's Tariff F.C.C. No. 2 and in Section 5 herein.

The remainder of this section establishes the method of separating VoIP-PSTN Traffic from the Customer's traditional intrastate access traffic, so that VoIP-PSTN Traffic can be billed in accordance with the FCC Orders.

REGULATIONS (cont'd)

- 2.3 Customer Premises Provisions (cont'd)
 - 2.3.3 <u>Jurisdictional Report Requirements</u> (cont'd)
 - (I) Identification and Rating of VoIP-PSTN Traffic (Cont'd)
 - Calculation and Application of Percent-VoIP- Usage Factors
 - a. The Company will determine the number of VoIP-PSTN Traffic minutes of use (MOU) to which interstate rates will be assessed by applying a terminating PVU factor to the total intrastate access MOU terminated by a Customer to the Company's end user. Beginning on July 1, 2014, the Company will also apply an originating PVU factor to the total intrastate access MOU originated by a Company end user and delivered to the Customer.
 - b. Reserved for Future Use.
 - c. The Customer will calculate and furnish to the Company a terminating PVU factor representing the whole number percentage of the Customer's total terminating intrastate access MOU that the Customer exchanges with the Company in the LATA that is sent to Company and which originated in IP format and that would be billed by the Company as intrastate access MOU. Beginning July 1, 2014, the Customer will also calculate and furnish to the Company an originating PVU factor representing the whole number percentage of the Customer's total originating intrastate access MOU that the Customer exchanges with the Company in the LATA that is received from the Company and that is terminated in IP format and that would be billed by the Company as intrastate access MOU.
 - d. The Customer shall not modify their reported PIU factor to account for VoIP-PSTN Traffic.
 - e. Both the Customer provided originating PVU and the terminating PVU shall be based on information such as the number of the Customer's retail VoIP subscriptions in the state (e.g. as reported on F.C.C. Form 477), traffic studies, actual call detail or other relevant and verifiable information which will be provided to the Company upon request.
 - f. The Customer shall retain the call detail, work papers, and information used to develop the PVU factors for a minimum of one year.
 - g. The Company shall use default factors until such time as Customer supplies such factors. For this purpose, Company will utilize a PVU equal to the percentage of VoIP subscribers in the state based on the Local Competition Report, as released periodically and/or such other reports as the Company deems appropriate and reasonable. Under the Local Competition report methodology, the PVU will be the total number of incumbent LEC and nonincumbent LEC VoIP subscriptions in a state divided by the sum of those reported VoIP subscriptions plus incumbent LEC and non-incumbent LEC switched access lines.
 - (2) The preceding section (1) will be applied to the billing of switched access charges to a Customer that is a local exchange carrier only to the extent that the Customer has also implemented billing of interstate access charges for VoIP-PSTN Traffic in accordance with FCC orders, rules and regulations.
